AX100  
Up to 5,000 gpd

**XL**  
AX-Max  
Up to 15,000 gpd\*

*\* Prepackaged. No Recirc Tank Required.*

## One size doesn't fit all.

Orenco's AdvanTex filters are now available for flows from 500 to 15,000 gpd. (That's our new AX-Max, the big guy, in the back.)

Small flows or big flows. Residential or commercial. Tight lots or generous lots. In-ground or above-ground. Single filters or multi-filter arrays. We have a model — and a configuration — that will work for you.

Regardless of size, though, ALL AdvanTex systems treat wastewater to better than secondary standards. Quietly.

Without odors. While using hardly any electricity. All are modular. All use Orenco's watertight fiberglass tanks. And all are easy to maintain.

Don't oversize or undersize your system. To get the right fit for the job, plus the name of an AdvanTex Dealer near you, call Orenco at 800-348-9843. We've got a lot more to talk about!
